

NC Inspection System

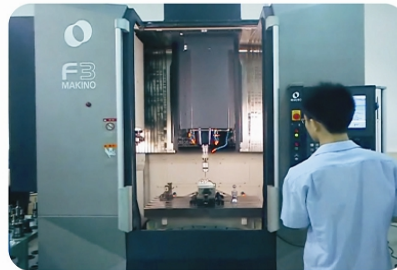

NC Inspection System:

- Make NC machine as a Full 3D Measuring Machine.
- Wireless Probe Sensing System
- Dimension Check before next machining Process.
- High Accuracy $\leq 0.003\text{mm}$
- Full CNC Inspection Programming. (Rational-DMIS CMM Software Used)
- Machine accuracy and error correction by the Inspection Software.
- Full 3D CNC Measuring, data direct send to Inspection Software for Process (software PTB Tested).
- Calibration of Probe, just like CMM machine.
- Reverse Engineering
